

Jellyfish look
a little like
umbrellas

Lobsters have
teeth in their
stomach to
help digest
their food.

An octopus
has no bones
so it can
squeeze in to
really small
spaces

Lobsters can
be right or left
handed ... just
like humans!

Turtles live in
the sea but
lay their eggs
on the beach

Fish do not have lungs but take oxygen out of the water passing over their gills

Dolphins are
very
intelligent
and playful

Crabs have
10 legs

Beaches keep
changing due
to waves,
wind and
weather

Seahorses
can change
colour for
protection

The sea level
rises and falls
each day

Sand can be
different
colours
